

Welcome

- You are about to participate in an experiment on decision making.
- Will be paid with cash vouchers privately at the end of the session.
- The money you earn depends on your decisions, the decisions of others and chance.
- The session will be conducted through your computer terminal.
- All interaction between you and the other participants will take place through the computers.
- Do not talk to or attempt to communicate with other participants.

Welcome

- Turn off phones and similar devices now.
- Close any application you may have open on your computers.
- The session will begin with an instructional period:
 - You will learn the main features of the task.
 - You will be shown how to use your computer.
- Raise your hand if you have any questions.

The Task

- You will be a member in a group of three.
- Each member will be assigned a color: RED, BLUE or GREEN.
- The task of the group is to choose two points: POINT A and POINT B.
- The choice of the group will be made by member GREEN.
- Members RED and BLUE will submit a recommendation to GREEN.

USE SELECTION

You will now see how this Round would look to Red:

At the same time as BLUE chooses their message, RED must also select a message to send.

RED does not know which message BLUE will send, nor will BLUE know the message chosen by RED.

You will now play as RED and choose their message.

See Red's Screen

You will next see how this Round would look to Green:

The message sent by BLUE and RED are the messages you selected. In the experiment BLUE and RED will be different subjects.

The GREEN player chooses the makes a choice on each circle. GREEN does not know the points chosen by the computer, GREEN only sees the recommendations sent by BLUE and RED, and the relative distance to their best points from their own.
