Bandits in the Lab

The file “bandits.do” in the folder “Supplement_to_Bandits-in-the-Lab” reproduces all tables and statistical statements in “Bandits in the Lab” by Johannes Hoelzemann and Nicolas Klein.

The data is stored in two separate files: “bandits_group-level.dta” and “bandits_individual-level.dta”.

The file “bandits.do” contains a directory that provides an interpretation of each variable.

The code follows all tables and statistical statements of the paper in chronological order.
